To be licensed, physicians must graduate from an accredited medical school, pass a licensing examination, and complete one to seven years of graduate medical education. Areas of Specialty Many PAs work in primary care areas such as general internal medicine, pediatrics, and family medicine. Professionals in other occupations requiring similar skills and critical judgments include acupuncturists, audiologists, chiropractors, dentists, nurse practitioners, optometrists, physician assistants, podiatrists, speech pathologists, and veterinarians.

Course progressions after the freshman year are not carved in stone. Any upper division cell biology class will work for most schools e. Medical schools are most concerned with the overall quality and scope of undergraduate work.

In addition to taking the required exams, you will need to contact each veterinarian who would be the Shelf exam for Gross Anatomy. For further information on veterinary education, write to:
