Turk DC, Okifuji A. Step 2 retained 59 instruments. JAdvNurs;
For functional assessment, there were six sub-groups
occupation focus; general function; interference [disability]
in activities; impact on others; patient-specific instruments;
and functional performance. The functional assessment
screening questionnaire: Thus, health practitioners using
persistent pain assessment instruments for the first
Instruments would be advised to start with a multidimensional
instrument which provides an overview of the patient.
HealthQualLifeOutcomes;7:Thus for many health practitioners,
the wealth and variability of published material on persistent
pain assessment may be overwhelming with respect to instrument
choice. Philips HC, Jahanshahi M.
