Through the process of inquiry, I had come to an understanding of content that I had always felt was beyond me. Is there an alternative explanation you can think of and why is your other one more credible? For example, I chose the lesson on how mealworms behave toward light – whether they move toward it, away from it, or are neutral to it.

Experienced teachers who are certified in other fields may find themselves vesting in a Guide for Teaching and Learning. I was all set to begin my new teaching role.

This is the heart of the scientific method, a process that must be experienced. Do you have evidence that your explanation is a good one?
