Abstract We propose a synthesis of anatomical, behavioral and ecological data in reconstructing the phylogeny and evolution of the ateline primates. Primates of the Atlantic Forest: List of Issues Current Issue Category: Garber PA, Estrada A. Chromosome speciation happens when some chromosome mutation results in a karyomorph or rearrangement that is distinct from the parental population and then is isolated in a small population where the mutation becomes fixed because of genetic drift. Organization of Communities, Past and Present, Oxford: Critical Issues in Cebine Evolution and Behavior. Tracking Capuchin Monkey articles Citing articles 0. Various characteristics of neotropical primates Platyrrhini are quite distinct from those of the Old World Catarrhini including the dental formula, the position of cranial plates, the anatomy of the auditory apparatus, much less average body weights, much less terrestrial adaptation, prehensile tails for some, and conservative phenotypes.
